

Parts of Speech - Adjectives

- Almost all words have a “part of speech”. Which part of speech a word has depends on how it is used in a sentence. Here is a list of the eight parts of speech:

Noun Verb Adjective Adverb Conjunction Preposition Pronoun Interjection

Adjective: An adjective is a word or phrase that is used to modify a noun or pronoun.

Example: The snake is long and green.

- In this example, the words “long” and “green” are adjectives because they modify the noun “snake”.
- Some words modify nouns that are *not* adjectives. These are attributive nouns. They are not predicative of the noun, so they are not adjectives.

Example: The baseball team is good.

- In this example, “baseball” modifies “team”. However, “baseball” is not an adjective because it is not predicative of the noun - **the team is *not* baseball**. “Good” is the only adjective in the sentence - **the team *is* good**.
